BellProx Fob Management

When Programming Fobs, a unique Reference number (User ID) must be assigned to each so that Fobs may be deleted from the system when lost or for example not returned by an employee who has left. Reference Numbers should be recorded along with the name of the person to whom it has been assigned. Each Fob also has a unique printed serial number. We recommend that this should also be recorded in case there is a need to identify the owner of a Fob. An example is shown below:-

Reference Number (User ID)	Name	Printed Fob Number
1	James White	0005240429
2	Jeff Goldstein	0005240430
*		
*		
11	Sally Smith	0005240439

Reference Number (User ID)	Name	Printed Fob Number

Reference Number (User ID)	Name	Printed Fob Number
