

*801 door entry telephone*

The model 801 is Bell Systems' original door entry telephone. It has been re-styled a number of times over the years and still maintains its classic design. The 801 telephone continues to be the most popular in the UK market owing to its exceptional reliability and economical price.

The model 801 telephone operates from both 12v AC or 12v DC and is included in the standard model 900 and VRK audio door entry systems as well as the CS and CSP series of combined keypad and proximity door entry systems.

## 801 door entry telephone

Model 801

The telephone is manufactured in white high-impact ABS plastic for high durability and complements most wall furnishings. It incorporates a 'lock release' push-button discreetly positioned on the base, and under the handset, to prevent inadvertent use. With its wide handset the model 801 is especially recommended for the elderly.

The Electronic Ringing Tone has a useful safety feature whereby the tone is reduced when the handset is 'off the hook'.

The telephone has two levels for the ringing tone. A HI or LO position can be set within the telephone on installation or at future date.

The model 801 telephone operates from both 12v AC or 12v DC and is included in the standard model 900 and VRK audio door entry systems. It is also included in the CS series of combined keypad and proximity door entry systems.

Dimensions: H = 212mm, W = 85mm, D = 55mm

Available models;

- Model 801 (standard)
- Model 801PS (with mute + privacy)
- Model 801-DESK (desk mount)

Model 801

**801S - Mute Switch.**

A switch is included on the side of the telephone to allow the user to mute the call-tone and prevent disturbances from nuisance calls.

**801P - Privacy of Speech.**

Any conversation between the visitor and the resident on the called telephone is totally private. The telephone will remain 'live' for a set period after being called and will then automatically close down the speech connection. The 'privacy of speech' feature is highly recommended on systems that have in excess of 10 stations. Without

this feature, the speech clarity of the system will be impaired if telephones are left 'off the hook'; this is more likely on a larger system.

The model 801-DESK is available for table top mounting. The model 801-DESK is factory fitted on a sloped pedestal for ease of use and has a captive cable with plug-in connector for the supplied telephone wall mounting socket.
